Evaluation Warning: The document was created with Spire.Doc for .NET.

S.No.	Issue
1	Forget password is not present in the login screen
2	When a New User has Login for the First time – Then an Alert should be displayed to Change the Password and Modules should be in Disable form until Password has been Changed.
3	Document Review Reminders should be displayed only for the Initiator Role.
4	System should accept Update Button in the Modification Screen – Only when at least one field is Modified.
5done	In Role Configuration – Modify Option is not required. System isn't displaying Confirmation Message upon Clicking Submit Button.
6	In Set Functional Profile – When the Role Name is changed for Modification immediately one after the Other – Then Respective Permission updating. For Modification – Update Button should be displayed instead of Submit. After Confirmation Message is displayed Button should be in Disable Mode and should be enabled only when any changes are made.
7	In Plant Configuration: Confirmation Message is wrong for Modification Screen. When Only Plant Address is Modified – System isn't accepting the Update Button. In Grid Page – Details are displaying Multiple Times i.e., Modification Details are also displaying Separately.
8	Back Buttons are not working Properly.
9	In User Configuration: Active/De-active Users is not Working.
